Environmental Health Subdivision Soil Evaluation Declination

Property Information
Address: _____

City, State, Zip: _____

Tax Map Number: _____

GPIN: _____

Subdivision Name: _____

Lots Declined for Evaluation: _____

Property Owner Name: _____

Phone: _____

I wish to subdivide property without Alamance County Environmental Health performing a soil evaluation, and I understand the following:

- This property will not be evaluated for septic system suitability
- If the parcel is approved to be subdivided, the plat certificate will attach and incorporate this declination noting the owner has declined to have property evaluated
- Property will require an evaluation for septic system suitability before a facility with water-using fixtures connected to a water supply source can be built upon the lot
- If application is later made for soil evaluation of this property, it is understood that approval for issuance of an improvement permit is based upon regulations in force at the time of permitting and is dependent on satisfactory completion of an individual detailed site evaluation following application and submission of a plan for proposed use.
